1.0 Introduction

1.1 Purpose

The purpose of this Performance Qualification (PQ) document is to verify the Clinevo OnePV Intake System 1.1 operates and performs to meet all the requirements specified in the System Requirements specification and Functional Requirements specification (SRS and FRS).

1.2 Scope

1.2.1 In Scope

The scope of this Performance Qualification (PQ) document is limited to OnePV Intake System 1.1 to ensure better quality management, completeness and timeliness.

1.2.2 Out of Scope

Not applicable (NA).

2.0 System Overview

The OnePV Intake Application supports pharmacovigilance case intake and processing activities by allowing authorized users to receive, review, and manage safety information from various intake channels. The system enables case registration, classification, and workflow management through a centralized interface. It also provides search and dashboard functionalities to help users track and manage intake cases efficiently. The application operates within a validated environment and uses role-based access control to ensure secure and compliant processing of pharmacovigilance data.

3.0 Acceptance Criteria

Expected result shall be identified for each step of the document and the actual results shall be evaluated against the acceptance criteria. Based on the evaluation, a determination shall be made by the executor as to whether the script meets the criterion (pass) or results to discrepancy (fail).

The results of the protocol execution shall be accepted, and the system shall be considered qualified under the following conditions:

- All required scripts have been successfully executed, the objectives have been met and all corresponding evidences are attached.
- All the discrepancies observed (if any) during the execution have been adequately resolved or addressed and approved.
- Appropriate documentation has been gathered, referenced, and stored.

4.0 Pass / Fail Criteria

Pass or Fail determinations shall be made upon evaluating the following:

- The Actual Result matches the Expected Result.
- The documentation associated with the execution is available.
- Pass or Fail is written in full at appropriate places.

5.0 Individual Identification Log

Description: This Log will ensure that all individuals involved in execution within the document can be readily identified.

Procedure: All individuals who participate in the execution, review, and / or any approach of this document must complete the information listed in the table below.

Name and Department	Role / Designation	Initials
Siva Sai Kanipakam and Testing	Reviewer /Associate Validation Manager	S.S.K
Abdul Hameed and Development	Reviewer / Product Manager	A.H
Aarti Singh and QA	Reviewer / QA Lead	A.S

6.0 Performance Qualification Test Scripts

6.1 Test Set# 1: Manual Case Registration Adverse Event Case

Test Case #:	1.	**Test Case Name:**	**Manual Case Registration - Adverse Event Case**	**Run #:**	01
Test Objective	To verify **Manual Case Registration for Adverse Event Case** Functionality.				
Pre-Requisites:	The user accounts used in this test set has been provisioned with appropriate permissions within the Clinevo OnePV Intake System to perform this test set.				

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
1.1.1.	**Scenario:** Accessing into Clinevo OnePV Intake Production Environment. **Steps to be followed:** 1. Open Browser.				

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	2. Enter the Production URL URL: https://prod.one-aipv.com/login 3. Click on the Enter (Keyboard operation). (Refer expected result) 		Clinevo OnePV Intake Production login page shall display.		
1.1.2.	**Scenario:** Login to Clinevo OnePV system **Steps to be followed:** 1. Enter the following details in Login Page • **User Name:** (Enter user name in text field) • **Password:** (Enter the password)				

Test Case #:	1.1.	Test Case Name:	Manual Case Registration – Adverse Event Case		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	Note: *Enter the valid password for the user account at the runtime. User entered password at the runtime will be masked for security reasons* • **Enterprise**: Clinevo (Enter the enterprise in the text field) 2. Click on **Login** button. (Refer expected result) 		On clicking Login button, user shall login into Clinevo OnePV Intake system and in the homepage, top right side logged-in username and logged on date and timestamp shall display.		
1.1.3.	**Scenario:** System shall allow to navigate **Manual Case Registration** page. **Steps to be followed:** From left menu under **Intake,** Click on **Manual Case Registration**. (Refer expected result)		Manual Case Registration shall display.		

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
					
1.1.4.	**Scenario:** System shall allow to **Register Case**. **Steps to be followed:** 1. In **Manual Case Registry Page,** under general info section enter the data in below fields, • **Case Classifications Code:** Adverse Event (Select case classification from dropdown) • **Case Intake Source Code:** (Select from the dropdown) • **Company Receipt Date:** (Select the date from the calendar) • **Processing Center Received Date:** (Select the date from the calendar)				

Test Case #:	1.1.	Test Case Name:	Manual Case Registration – Adverse Event Case		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	2. Click on the **Save** button. (Refer expected result)  3. Click on **OK** button from the confirmation message.		System shall register case successfully with confirmation message and temporary case Id shall create.		
1.1.5.	**Scenario:** System shall allow to add Questionnaire manually. **Steps to be followed:** 1. Under ***General Info***, from Questionnaire tab click on **add questions** button. (Refer expected result 1) 2. In Additional Question message, click on **Add Questions Manually** radio button and enter data in below fields,		1. System shall display Additional Questions message		

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	• **Field Type:** (Select from the dropdown) • **Question:** (Enter question in the text field) 3. Click on the **Save** button. (Refer expected result 2)  4. Click on **OK** button from the confirmation message.		2. System shall manually add questions with confirmation message and display under Questionnaire tab.		
1.1.6.	**Scenario:** System shall allow to provide response for manually created question. **Steps to be followed:** 1. Under response column, enter the response for the added questions.				

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	2. Under Questionnaire tab, click on the **Save** button. (Refer expected result)  3. Click on **OK** button from the confirmation message.		Data shall save successfully with confirmation message.		
1.1.7.	**Scenario:** System shall allow to add Questionnaire from template. **Steps to be followed:** 1. Under ***General Info***, from Questionnaire tab click on **add questions** button. 2. In the Additional Question message, click on **Add Questions from Template** radio button and select template. 3. Click on **Select** button.				

Test Case #:	1.1.	Test Case Name:	Manual Case Registration – Adverse Event Case		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	(Refer expected result)  4. Click on **OK** button from confirmation message.		Template shall add successfully with confirmation message.		
1.1.8.	**Scenario:** System shall allow to provide response for created question from template under Questionnaire tab. **Steps to be followed:** 1. Under Questionnaire section, click on imported template tab. 2. Under response column, Enter the data for the provided question. 3. Under Questionnaire tab, click on the **Save** button. (Refer expected result)		Data shall save successfully with confirmation message.		

Test Case #:	1.1.	Test Case Name:	Manual Case Registration – Adverse Event Case		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	 4. Click on **OK** button from confirmation message.				
1.1.9.	**Scenario:** System shall allow to add reporter. **Steps to be followed:** 1. Under ***Reporter section***, enter data in below details: • **Title:** (Choose the value from dropdown) • **First Name:** (enter the data) • **Last Name:** (enter the data) • **Sex code:**				

Test Case #:	1.1.	Test Case Name:	Manual Case Registration – Adverse Event Case		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	(Select from dropdown) • **Relationship With Patient Code:** (Select from dropdown) • **Reporter Type code:** (Select from dropdown) • **Is Reporter Health Care Professional:** (Enable toggle button) • **Address1:** (enter the data) • **Address2:** (enter the data) • **City:** (enter the data) • **State:** (enter the data)				

Test Case #:	1.1.	Test Case Name:	Manual Case Registration – Adverse Event Case		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	• **Country code:** (Choose Country from the dropdown) • **Zipcode:** (enter the data) • **Fax:** (enter the data) • **Contact Number:** (enter the data) • **Email Address:** (enter the data) 2. Click on the **Save** button. (Refer expected result)  3. Click on **OK** button from confirmation message.		System shall add Reporter information successfully with Confirmation message.		
1.1.10.	**Scenario:** System shall allow to Add Patient information.				

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	Steps to be followed: 1. Under ***Patient Information*** section, enter the data in below details: • **Initials:** (Enter the data) • **Is Reporter As Patient:** No (Select from the dropdown) • **Title:** (Select from dropdown) • **First Name:** (Enter the data) • **Last Name:** (Enter the data) • **Occupation:** (Enter the data)				

Test Case #:	1.1.	Test Case Name:	Manual Case Registration – Adverse Event Case		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	• **Date of Birth:** (Select date) • **Sex Code:** (Enter the value from dropdown) • **Address 1:** (Enter the data) • **Address 2:** (Enter the data) • **State:** (Enter the state) • **Country Code:** (Enter the value from dropdown) • **Zip Code:** (Enter the data) • **Contact Number:** (Enter the data)				

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	• **Email Address:** (Enter the data) 2. Click on **Save** button. (Refer expected result) 3. Click on **OK** button from confirmation message.		System shall add Patient information successfully with Confirmation message.		
1.1.11.	**Scenario:** System shall allow to Add product. **Steps to be followed:** 1. Under ***Product Information*** section, enter the data in below fields, • **Product Name:** (Click the Search icon, enter the product name in the search field, and click the Search button. Select the required product using the radio button, and click the Select button.) • **Generic Name:**				

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	(Auto-Populate) • **Formulation Code:** (Auto-Populate) • **Additional Drug Information:** (enter the data) 2. Click on **Save** button. (Refer expected result)  3. Click on **OK** button from confirmation message.		System shall add Product information successfully with Confirmation message and product information hyperlink shall display.		
1.1.12.	**Scenario:** System shall allow to **Add Event Information**. **Steps to be followed:** 1. Under ***Event Information*** section, enter the data in below fields, • **Reaction Or Event As Reported:** (Enter the data in the text field)				

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	• **Reported Term:** (Enter term and click on the reported term search icon and select the meddra code) (Refer expected result 1) • **Start Date:** (Select date from the Calendar) • **End Date:** (Select date from the Calendar) 2. Under **Assessment** section, Select value for below dropdowns**:** • **Case Serious Reporter Code:** • **Case Serious Company Code:** • **Outcome Code:** • **Lack Of Efficacy:** 3. Under **Seriousness** section, select value for below dropdowns**:** • **Death:** • **Hospitalization:**		1. Meddra code shall display successfully.		

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	• **Life Threatening:** • **Disabling:** • **Congenital Anomaly:** • **Intervention Required:** • **Medically Significant:** • **Others:** 4. Click on **Save** button. (Refer expected result 2) 5. Click on **OK** button from confirmation message.		2. System shall add Event information successfully with Confirmation message.		
1.1.13.	**Scenario:** Verifying Reported Term's Meddra Code. **Steps to be followed:** 1. Navigate to ***Event Information*** tab. 2. Under Event Information, verify the **Reported term** meddra coded. (Refer expected result)		Meddra code shall display.		

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
					
1.1.14.	**Scenario:** System shall allow to add Log details. **Steps to be followed:** 1. Under ***activity log***, click on **Add** button. 2. In the Activity log create page, enter data in below details, • **Open Date:** (Select date) • **Close Date:** (Select date) • **Type:** (Select type from dropdown) • **Comments:**				

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
	(Enter comment) 3. Click on **Save** button. (Refer expected result)  4. Click on **OK** button from confirmation message.		System shall add activity log successfully with confirmation message.		
1.1.15.	**Scenario:** System shall allow to Submit case. **Steps to be followed:** 1. Click on **Save** and **Submit** button. (Refer expected result 1) 2. Click on **Yes** from the Open Case Confirmation message. (Refer expected result 2) 		1. System shall successfully submit the case and generate case number. ***Note:*** *Note the case number.* 2. Case processing shall display.		

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
1.1.16.	**Scenario:** Verifying Meddra Code of Event Information in Case Processing page. **Steps to be followed:** Navigate to ***Event Information*** section, verify the Reported term by mouse hovering on right mark. (Refer expected result) 		Meddra Code data shall display successfully.		
1.1.17.	**Scenario:** System shall allow to **Exit** from the case processing. **Steps to be followed:** 1. From the **Adverse Event case processing** page, click on **Exit** icon from top menu. 2. Click on **YES** from message. (Refer expected result)		User shall successfully exit from the case.		

Test Case #:	1.1.	**Test Case Name:**	**Manual Case Registration – Adverse Event Case**		
Step #	**Procedure**		**Expected Results**	**Does Observed Result Match Expected Result? Pass/ Fail (if Fail give details)**	**Initials / Date**
					
1.1.18.	**Scenario:** System shall allow to **Logout**. **Steps to be followed:** 1. From the **Case intake search** page, click on the ***user profile*** icon. 2. Click on the **Logout** button. 3. Click on **Yes** from the confirmation message. (Refer expected result) 		User shall successfully logout.
